

NATULON®

Recycled materials

YKK
Little Parts. Big Difference.™

NATULON® is a common brand name for items made from recycled materials, reducing the need for virgin materials through the use of advanced chemical or mechanical recycling technologies.

- NATULON® made with ECONYL® regenerated nylon
- NATULON® Chemically recycled polyester
- NATULON® Mechanically recycled polyester

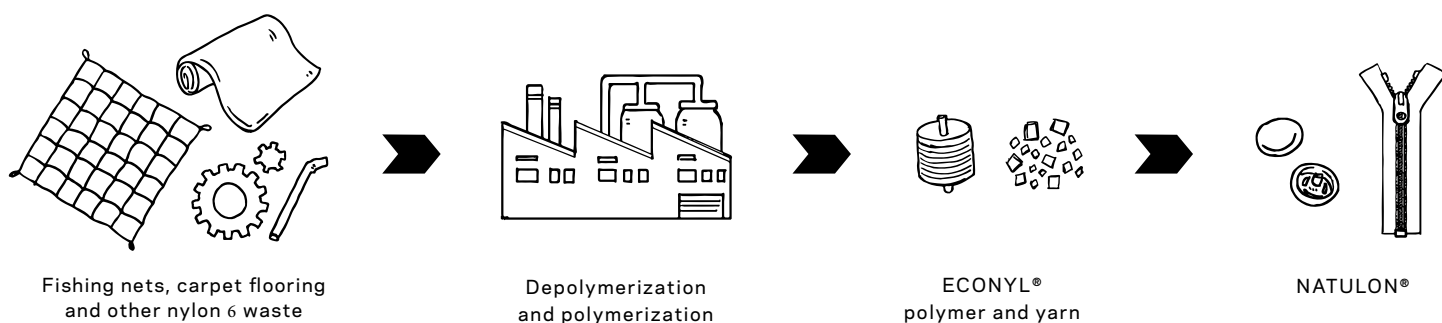

"YKK", the combined mark of "YKK Little Parts. Big Difference.",
"EXCELLA", "VISLON" and "NATULON"
are registered trademarks of YKK CORPORATION in Japan and other countries/regions.

Other trademarks are the property of their respective owners

NATULON®

made with ECONYL® regenerated nylon

YKK's expertise in the development of innovative products translates into a range of items made with regenerated and recyclable nylon to support the circular economy. Free separation of different polymers into appropriate waste streams minimizes resource waste. Using ECONYL® regenerated nylon, even partially, reduces the item's overall environmental impact.

NATULON® with ECONYL® regenerated nylon is available with:

EXCELLA® size: 5, 8

ADVANCEN® snap size: 15 mm

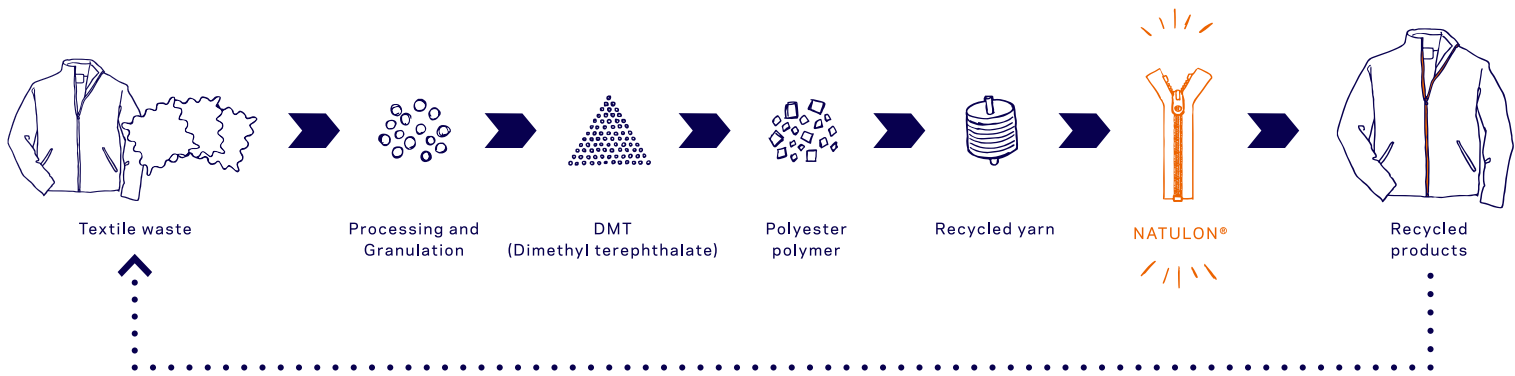

VISLON® size 5

Should you or your customer want to use of ECONYL® brand and story, you need to contact Aquafil (HYPERLINK "mailto:ntf@econyl.com"ntf@econyl.com) to receive authorization and more information, as the use of ECONYL® trademark and story is subject to license.

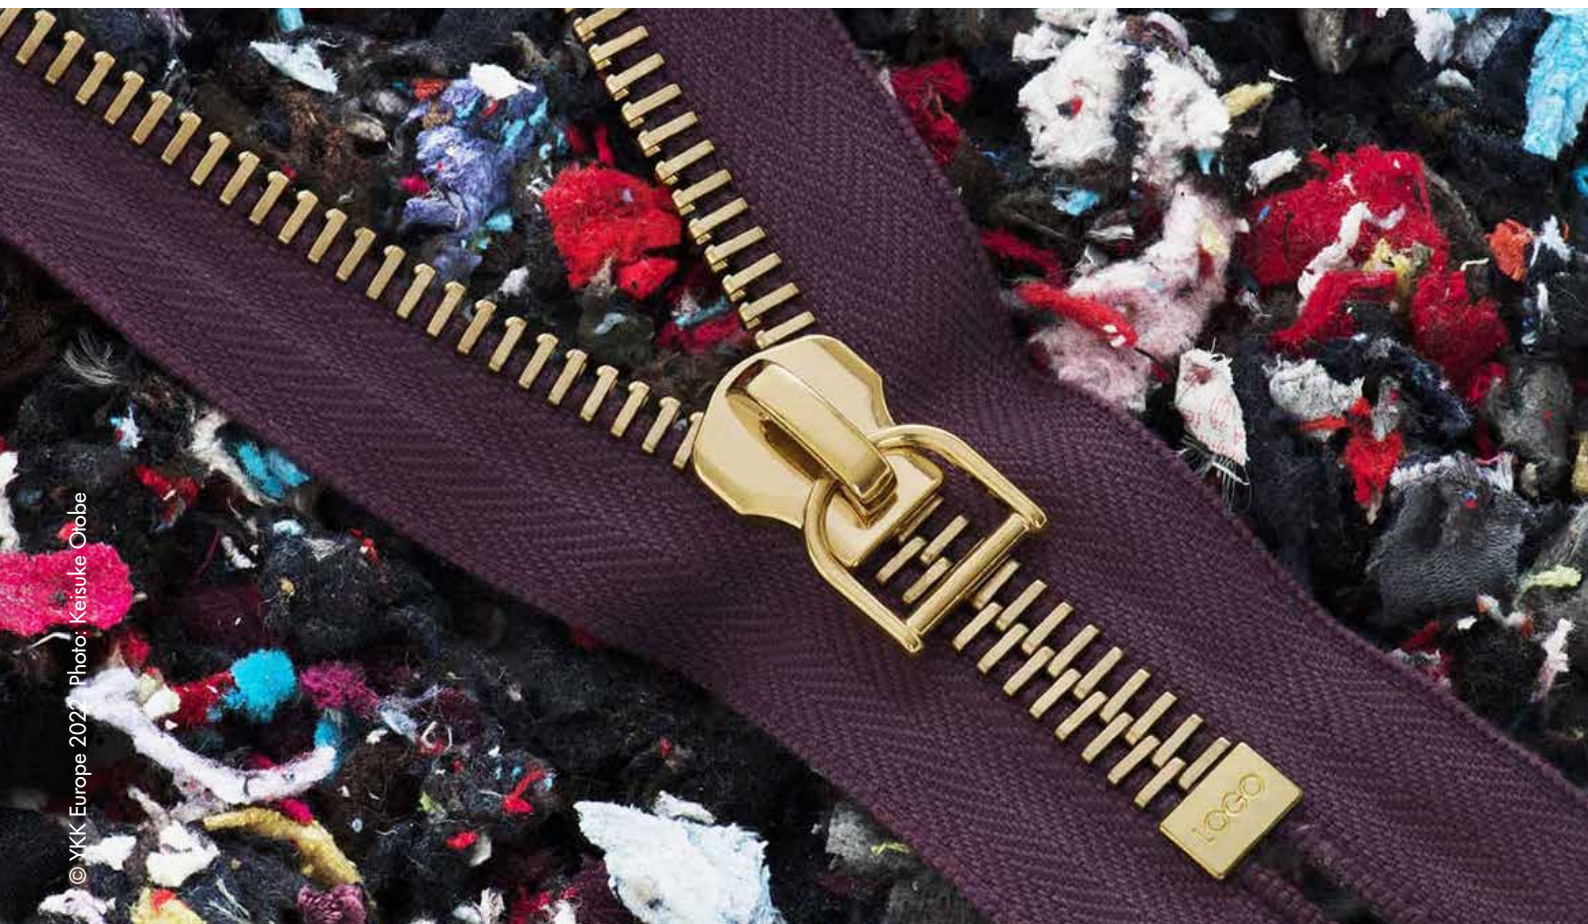

NATULON®

Chemically recycled polyester

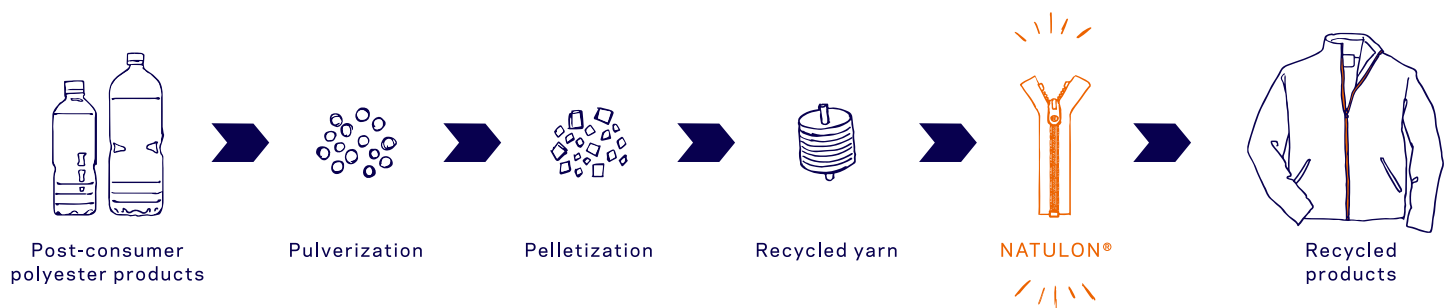

NATULON® with chemically recycled polyester tape has been specially designed to help reduce waste in the fashion industry by using post-industrial textile waste. In case of chemical recycling, the material can be recycled indefinitely, because depolymerization takes the material back to its original chemical building blocks.

NATULON® with chemically recycled polyester tape is available with:
EXCELLA® size 2, 3, 5, 8, 10
EXCELLA® Light size 3, 5, 8
Standard metal size 3, 5
CONCEAL® size 2, 3

NATULON®

Mechanically recycled polyester

NATULON® with mechanically recycled polyester tape manufactured from yarns made from PET material (recycled plastic bottles) aims to reduce the use of materials derived from petroleum, the emission of greenhouse gases and the disposal of plastic waste.

NATULON® with mechanically recycled polyester tape is available with:
Standard metal *size 3, 5*
VISLON® *size 3, 5, 8*
Coil *size 3, 5, 8*
