

# STAINLESS STEEL

**YKK**  
Little Parts. Big Difference.™

Stainless steel used for chain, sliders, pullers and bottom stops and the snaps is free of scratches, oxidation and corrosion. It is strong, light and hypoallergenic. The material does not require any plating, which makes it very eco-sustainable.

# Stainless steel polished metal zipper

## Excella® Stainless Steel

Stainless steel used for chain, sliders, pullers, and bottom stops is free of scratches, oxidation and corrosion. It is strong, light and hypoallergenic. The material does not require any plating, which makes it very eco-sustainable.

What else can we do for the ultimate in elegance, comfort and your peace of mind?

- ✓ 100% Stainless steel for metal parts, nickel free
- ✓ No additional finishes are required
- ✓ Strong material but smooth operation

# Stainless steel durable snap & button

## FlexFix® Stainless Steel

The snap also deserves the best materials and technology to reduce the use and waste of harmful chemicals. With Stainless Steel material and FlexFix® durable technology, YKK offers both.

- ✓ Stainless steel for metal parts, nickel free
- ✓ No additional finishes are required
- ✓ High performance durable FlexFix® technology\*
- ✓ Personalisation is available
